EDUCATION

Zaporizhzhya National Technical University - Computer Science, Ukraine

SEPT. 2021 - Current

Studying now. I have an Artificial Intelligence oriented program, but as of now I have more fun with Web Development.

PROJECTS

Web Chat App — *NextJS online chat application*

Online real time chat application utilizing NextJS 13, React components, Typescript, TailwindCSS as well as MongoDB using Prisma as a database and Google Authentication with Next Auth, I've created a fully working chat website. (<https://github.com/MightComeback/chat-webapp>)

Youtube Randomizer — *Random youtube videos*

Random Youtube video generator using Youtube API, React, JavaScript and TailwindCSS, built for fun, for users to explore videos they would never see. (<https://github.com/MightComeback/youtube-randomizer>)

Infinite Rain — *Listen to rain sounds*

A small website to listen to sounds of rain and rain videos. I've used React, JavaScript and TailwindCSS to implement this basic website. (<https://github.com/MightComeback/rain-vibes>)

Checkers — *C++ Checkers game*

Open source Checkers game made for course projects, using QT Creator and utilizing my almost 2 year C++ experience. (<https://github.com/MightComeback/checkers-qt>)
